

ERIC HAZE

Lives and Works in New York City

Eric Haze has been impacting the worlds of graphic and product design, fashion, street and fine art for over thirty years. A self proclaimed pop artist - speaking in terms of "population" - a wealth of Haze's work has long been about reaching the largest possible demographic though the cross pollination of different genres.

This prolific artist came up in the '70s, graffiti bombing the streets of NYC, spent the early '80's observing and exhibiting alongside the likes of renown artists Keith Haring and Jean-Michel Basquiat, and saw the '90s through with his eponymous clothing line and graphic driven contributions to the establishment of hip hop. To date, Haze has re-emerged cementing his place in the fine arts with several solo and group exhibitions in New York, Los Angeles, Amsterdam and Hong Kong. This legendary icon has come full circle back to New York, and Anonymous Gallery is proud to unveil Haze's latest compositions that bring the artist back his roots, connecting with the medium that allows him the organic process of hand rendering, and the expression of its consequent fluidity of line and motion.
